BIG DATA

Graph Connectivity is the single most persistent characteristic of today's networks environment. Networks with even a modest degree of complexity are not random, which means connections are neither evenly distributed nor static. simple statistical analysis alone fails to sufficiently describe connected systems. Therefore, most big data analytics today do not effectively

Education and the COVID-19 pandemic

The COVID-19 pandemic is a huge challenge to education systems. This Viewpoint offers guidance to teachers, institutional heads, and officials on addressing the crisis. What preparations should institutions make in the short time available and how do they address students' needs by level and field of study? Reassuring students and parents is a vital element of institutional response.
